## **LOGIC Devices Announces European Sales Director**

SUNNYVALE, CA – January 26, 2006 - LOGIC Devices Incorporated (Nasdaq: LOGC) today announced the appointment John Walsh as European Sales Director. Mr. Walsh joins LOGIC Devices with over 20 years of successful experience in sales and marketing. He is charged with establishing closer ties between LOGIC Devices, its European sales channels and major European networking and communications manufacturers.

As LOGIC Devices expands its product line and begins to target networking and communications markets, Walsh will lead LOGIC's sales effort in Europe. Currently a sizeable proportion of LOGIC's overall sales revenue, Europe is expected to remain a center of design-in activity for the Company's new product focus. Building on LOGIC's success in Europe with its broadcast video product line, Mr. Walsh will help grow the business as the Company broadens its product line.

“John possesses a great deal of experience in supporting key networking and telecom market accounts. He brings to LOGIC an impressive track record and strong skill set appropriate for this effort,” said Bill Volz, president of LOGIC Devices.

"We look forward to capitalizing on John's strong background as he joins LOGIC to expand our business across Europe." Prior to joining LOGIC Devices, Mr. Walsh worked as Sales Director Europe for E2O (acquired by JDS Uniphase) and InSilicon Corp.
